## Fun Learning Activities

### What is Fun Learning ?

Fun Learning is a holistic approach to early education created by Fun Academy. It helps teachers to promote key life skills to children, and nurtures the passion for learning through play and exploration.

### Why Fun learning?

Learning is how we become the best version of ourselves. It should be an exhilarating, motivating and transformative experience.

### The Fun Learning Approach:

- ✓ Fuels curiosity, fosters creativity and triggers a passion for learning from the very start.
- ✓ It also encourages every child and teacher to become lifelong learners.
- ✓ Enables teachers to bring scientific thinking, nutrition, physical activity, mindfulness and meaningful use of technology, into the classroom.
- ✓ The school experience becomes FUN and engaging with collaborative learning through play and exploration.

- ✓ We at KV Shivgarh strive for achieving the optimum results through the FUN Learning pedagogy.

A glimpse of the Fun learning activities have been mentioned hereunder:

### Sense and smell activity

To develop the understanding of senses the sense and smell activity is conducted in the classes.

The students participate in the activity as a FUN activity and gain a lot of knowledge about their senses.

As a part of 3 month play based activity "VIDYA PRAVESH", the students develop interest in understanding their surroundings and this creates strong base for understanding the Environmental studies.

### Touch board activity

This is a FUN activity where children learn through a touch board. They develop numeracy skill as well as spatial orientation. This activity develops cognitive skill in the students.

Through such activities students understand and develop interests in

Mathematics.

We at KV Shivgarh, Raebareli emphasize on learning by doing and FUN learning.

## Clay modelling

We at KV Shivgarh believe that students are like a clay in the hands of the teachers, they mould them and give shape to their future. Similarly the students play with clay and give shape to the models of their choice. As a part of 3 month play based activity "VIDYA PRAVESH", the students develop interest in the field of art.

## Music Activity

Under the able guidance of trained music teacher Dr.Anjani Kumar Mishra the students learn to play various musical instruments develop insights of music. Music is a part of the curriculum of KVS.

It is a matter of great pride that students of KV Shivgarh have been recognized at cluster , regional level.
